Mitozz boosts cellular health from its core

- This specially formulated herbal supplement is designed to support a key physiological axis that often deteriorates with **aging** or the development of **chronic diseases**.
- By protecting and improving mitochondrial function, it significantly contributes to **overall well-being**, resulting in increased energy, improved memory, muscle strength, and more restful sleep.

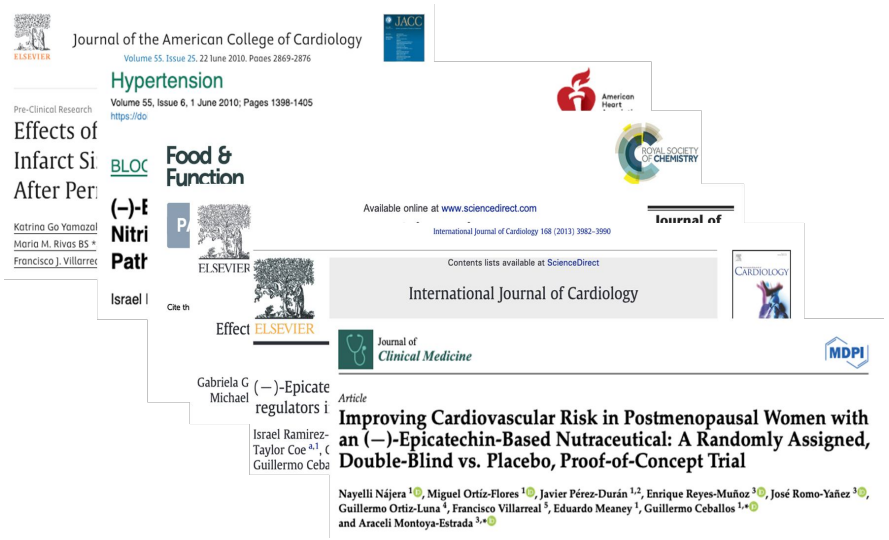
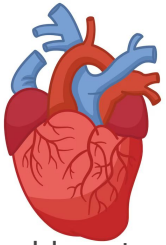
Backed by over **15 years of scientific evidence**

With published studies demonstrating
benefits for key organs:



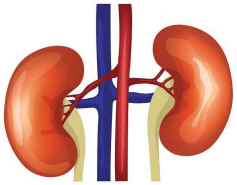


Heart

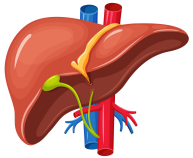
Brain

Blood vessels

Muscles



Kidneys



Liver

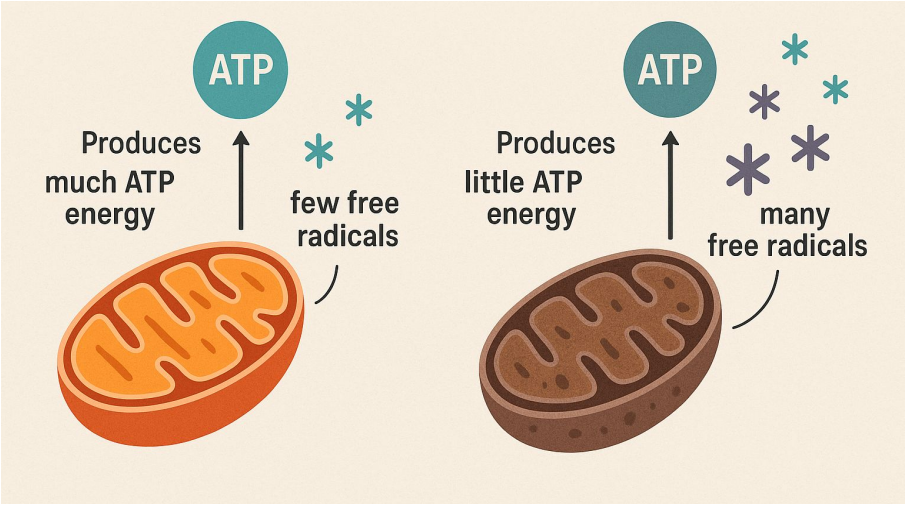
The impact of **mitochondrial health**



Healthy mitochondria

Aged mitochondria

- **Aging** wears down mitochondria, producing less ATP and excess free radicals.
- Aged mitochondria cause **inflammation** and facilitate the **development of disease**.
- Diseases cause **mitochondrial inflammation** and its progression.

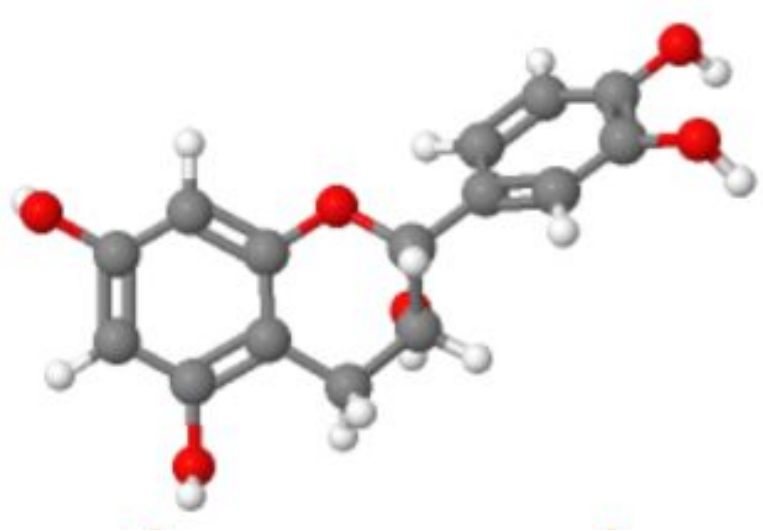
Epicatechin, capable of preventing and improving diseases and increasing quality of life



- **Protects** mitochondria
- **Repairs** mitochondria
- **Multiplies** mitochondria
- **Stimulates** mitochondria

How does Mitozz work?

Patients with rare or chronic diseases

•Improves cellular energy production, combating chronic fatigue.

•Reduces oxidative stress and systemic inflammation.

•Supports cellular regeneration and mitochondrial function impaired by underlying diseases.

Older adults (60+ years)

•Stimulates mitochondrial biogenesis, helping to slow age-related cellular deterioration.

•Improves memory, cognitive performance, and sleep quality.

•Helps maintain muscle strength and mobility.

How does Mitozz work?

Athletes and active individuals

•Increases ATP production, improving endurance and muscle recovery.

•Reduces post-workout oxidative damage.

•Promotes mitochondrial adaptation, optimizing physical performance.

People with metabolic or cardiovascular diseases

•Improves insulin sensitivity and lipid metabolism.

•Promotes healthy vascular function.

•Helps reduce chronic inflammation and the risk of cardiovascular complications.

Leading scientific authorities who have dedicated the last 20 years to **developing the solution.**

At FMG Health Sciences Inc., we don't just believe in boosting energy; we believe in supporting the root of vitality: the health and function of mitochondria. Our mission is simple yet profound: to multiply, strengthen, and revitalize these tiny but powerful structures, giving cells the support they need to function, repair, and evolve.

Because when cells function better, so do you.

Mani Agrawal, PhD, CEO
Over 30 years of experience in complex global operations, formerly with McKinsey, based in the US and Mexico.

Francisco Villareal, MD, PhD, CMO
Professor and researcher with more than 130 peer-reviewed publications, based in California.

Guillermo Ceballos, MD, PhD, CSO
Professor and researcher with more than 275 peer-reviewed publications, based in Mexico.
