MITOZZ

copyright©2025, FMG Health Sciences, Inc.

Our trillions of **mitochondria**, present in every cell, are the source of more than **90% of the energy** we need to live.

Mitochondria are the body's powerhouse!

FMG HEALTH SCIENCES

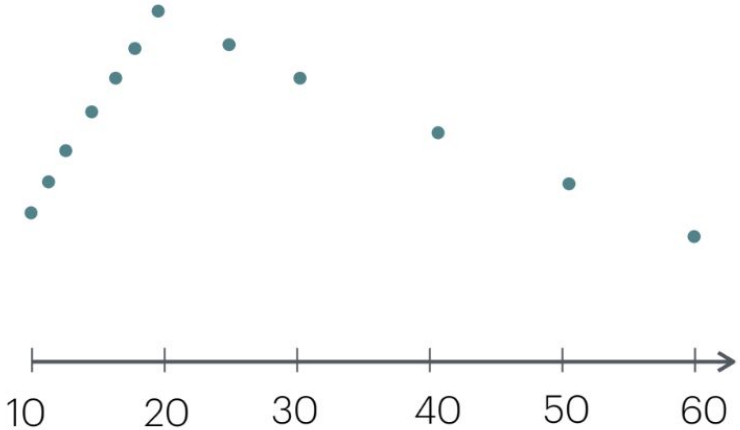
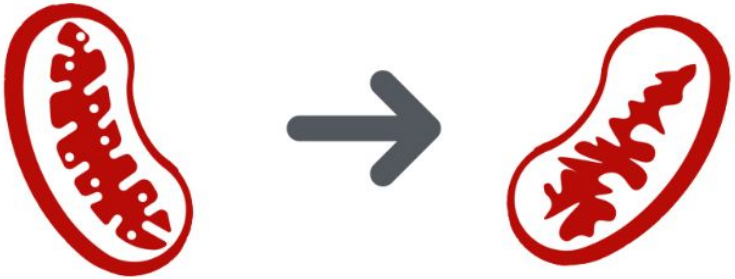
With **age**, the number and health of mitochondria **decreases**



Decrease with age



Degradation with age

However, we have the solution…

FMG HEALTH SCIENCES

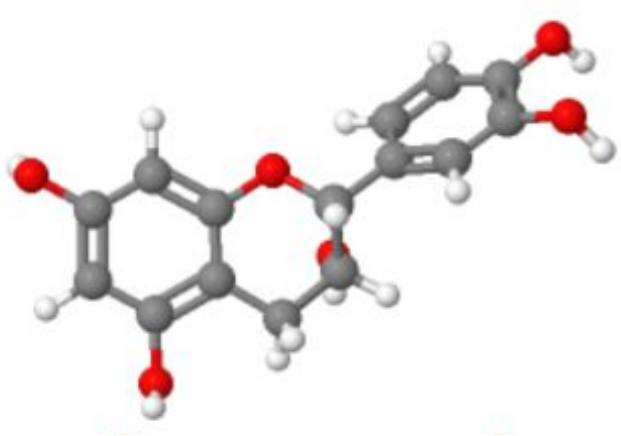
Epicatechin is capable of preventing and improving diseases and increasing the quality of life



Protects, repairs, multiplies and stimulates mitochondria

it means

Increases the number and health of mitochondria

FMG HEALTH SCIENCES

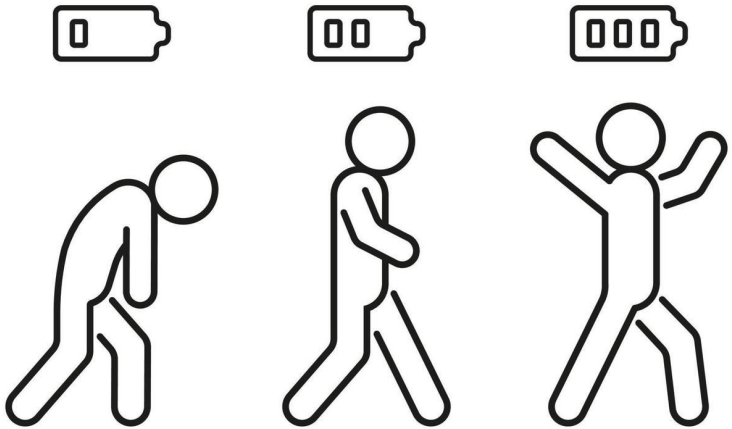
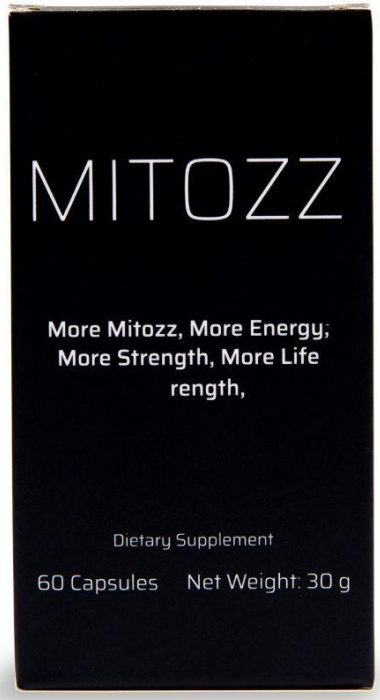
- Improves cellular function
- Improves muscle function
- Reduces fatigue
- Faster recovery after exercise
- Improves mitochondrial health
- Improves cognitive ability
- Improves lipid metabolism
- Improves hypertension
- Reduces inflammation



copyright©2025, FMG Health Sciences, Inc.

Mitozz is a nutraceutical made from **epicatechin** with a carefully optimized formulation and dosage

- Completely **natural**
- Contributes significantly to **overall well-being**
- Produces **more energy**
- Helps **improve memory**
- Increases **muscle strength**
- Helps promote **more restful sleep**



FMG HEALTH SCIENCES

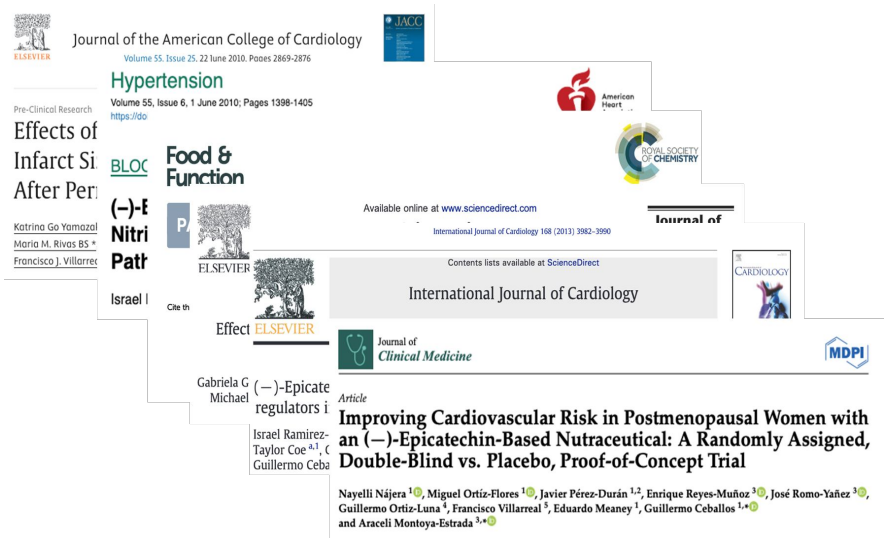
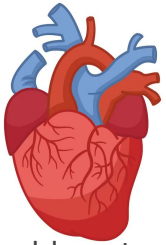
Backed by over **15 years of scientific evidence**

With published studies demonstrating
benefits for key organs:



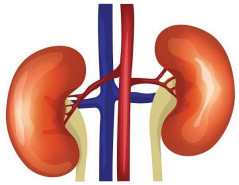


Heart

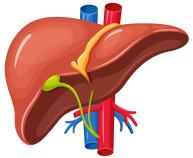
Brain

Blood vessels

Muscles



Kidneys



Liver

How does Mitozz work?

Patients with rare or chronic diseases

•Improves cellular energy production, combating chronic fatigue.

•Reduces oxidative stress and systemic inflammation.

•Supports cellular regeneration and mitochondrial function impaired by underlying diseases.

Older adults (60+ years)

•Stimulates mitochondrial biogenesis, helping to slow age-related cellular deterioration.

•Improves memory, cognitive performance, and sleep quality.

•Helps maintain muscle strength and mobility.

How does Mitozz work?

Athletes and active individuals

•Increases ATP production, improving endurance and muscle recovery.

•Reduces post-workout oxidative damage.

•Promotes mitochondrial adaptation, optimizing physical performance.

People with metabolic or cardiovascular diseases

•Improves insulin sensitivity and lipid metabolism.

•Promotes healthy vascular function.

•Helps reduce chronic inflammation and the risk of cardiovascular complications.

Leading scientific authorities who have dedicated the last 20 years to **developing the solution.**

At FMG Health Sciences Inc., we don't just believe in boosting energy; we believe in supporting the root of vitality: the health and function of mitochondria. Our mission is simple yet profound: to multiply, strengthen, and revitalize these tiny but powerful structures, giving cells the support they need to function, repair, and evolve.

Because when cells function better, so do you.

Mani Agrawal, PhD, CEO
Over 30 years of experience in complex global operations, formerly with McKinsey, based in the US and Mexico.

Francisco Villareal, MD, PhD, CMO
Professor and researcher with more than 130 peer-reviewed publications, based in California.

Guillermo Ceballos, MD, PhD, CSO
Professor and researcher with more than 275 peer-reviewed publications, based in Mexico.
